Evaluation for Continuing Education Alan B. Knox 2002-05-24 Everyone associated with educational programs for adults makes evaluative judgments-consciously or unconsciously-about the worth and effectiveness of the program. But while many in the field continually tout the importance of evaluation, the process is woefully underused in practice. Among the many reasons for this is that there has been a lack of dependable guidelines and useful examples to ensure that program evaluation is worth the effort-until now. *Evaluation for Continuing Education* provides the useful and practical tools necessary to ensure a successful program evaluation. The book presents systematic guidelines aimed at enhancing understanding of evaluation concepts and procedures, and offers manageable ways to selectively include evaluation activities as an integral part of program planning, implementation, and justification. Author Alan Knox reveals that the key to successful evaluations that improve education programs for adults is a basic rationale for why and how. He helps readers select and develop their own rationale throughout the course of the book while suggesting fundamental evaluation concepts and procedures. He shows how to distinguish some program aspect upon which a specific evaluation project will focus-including needs assessment, goals and policies, staffing assessment, materials development, and more-and summarizes examples of evaluation reports that reflect the various types of providers and scales on which evaluations are conducted. Knox offers a particularly wide variety of these examples, enabling readers to reflect on implications for their own evaluations and fashion unique guidelines and procedures that fit their own situations. Program planners in any type of continuing education programs-including continuing education in the professions, ESL programs, community colleges, vocational training programs, and others-will find *Evaluation for Continuing Education* an indispensable resource for achieving successful evaluations.
