The Librarian's Guide to Genealogical Services and Research James Swan 2004
For the patron who thinks she can trace her lineage back to the Mayflower or the student trying to find the beginnings of his family tree, family history is an individualized and often specialized strand of research. Now James Swan, a librarian and genealogist with forty years of experience, helps to make any librarian an expert in genealogy. He covers the

research process in detail and shows where to find and how to use all the documents involved - censuses, birth, marriage and death Certificates, and many often-overlooked personal papers. Methods for improving library service to patrons, including building collections, acquiring and preserving local data, identifying and accessing remote resources, and more are covered in-depth. An entire section is devoted to a step-by-step guide for constructing a family history, which can be used by librarians, archivists, family history workers or interested amateurs. A checklist of key indexes and databases is included to ensure thorough research. Sections for technology link users to the genealogical resources on the Web. The companion CD provides hyperlinks for all the recommended Web sites and 25 printable charts, lists, and forms (includ

Rebecca Barr 2016-11-18 A comprehensive overview of important contemporary issues in the field of reading research from the mid 1980s to mid 1990s, this well-received volume offers readers an examination of literacy through a variety of lenses--some permitting microscopic views and others panoramic views. A veritable "who's who" of specialists in the field, chapter authors cover current methodology, as well as cumulative research-based knowledge. Because it deals with society and literacy, the

first section provides the broadest possible view of literacy. The second section defines the range of activities culturally determined to be a part of the enterprise known as literacy. The third focuses on the processes that individuals engage in when they perform the act of reading. The fourth section visits the environment in which the knowledge that comprises literacy is passed on from one generation to the next. The last section, an epilogue to the whole enterprise of reading research, provides apt philosophical reflection.

Before Harlem Ajuan Maria Mance 2016-03-15 Despite important recovery and authentication efforts during the last twenty-five years, the vast majority of nineteenth-century African American

writers and their work remain unknown to today's readers. Moreover, the most widely used anthologies of black writing have established a canon based largely on current interests and priorities. Seeking to establish a broader perspective, this collection brings together a wealth of autobiographical writings, fiction, poetry, speeches, sermons, essays, and journalism that better portrays the intellectual and cultural debates, social and political struggles, and community publications and institutions that nurtured black writers from the early 1800s to the eve of the Harlem Renaissance. As editor Ajuan Mance notes, previous collections have focused mainly on writing that found a significant audience among white readers. Consequently, authors whose work appeared in African American-owned publications for a primarily black audience—such as Solomon G. Brown, Henrietta Cordelia Ray, and T. Thomas Fortune—have faded from memory. Even figures as celebrated as

Frederick Douglass and Paul Laurence Dunbar are today much better known for their “cross-racial” writings than for the larger bodies of work they produced for a mostly African American readership. There has also been a tendency in modern canon making, especially in the genre of autobiography, to stress antebellum writing rather than writings produced after the Civil War and Reconstruction.

Similarly, religious writings—despite the centrality of the church in the everyday lives of black readers and the interconnectedness of black spiritual and intellectual life—have not received the emphasis they deserve. Filling those critical gaps with a selection of 143 works by 65 writers, *Before Harlem* presents as never before an in-depth picture of the literary, aesthetic, and intellectual landscape of nineteenth-century African America and will be a valuable resource for a new generation of readers.

Indian Education in the American Colonies, 1607-1783
Margaret Szasz 1988 Armed with Bible and primer, missionaries and teachers in colonial America sought, in their words, "to Christianize and civilize the native heathen."

Both the attempts to transform Indians via schooling and the Indians' reaction to such efforts are closely studied for the first time in Indian Education in the American Colonies, 1607-1783. Margaret Connell Szasz's remarkable synthesis of archival and published materials is a detailed and engaging story told from both Indian and European perspectives. Szasz argues that the most intriguing dimension of colonial Indian education came with the individuals who

tried to work across cultures. We learn of the remarkable accomplishments of two Algonquian students at Harvard, of the Creek woman Mary Musgrove who enabled James Oglethorpe and the Georgians to establish peaceful relations with the Creek Nation, and of Algonquian minister Samson Occom, whose intermediary skills led to the founding of Dartmouth College. The story of these individuals and their compatriots plus the numerous experiments in Indian schooling provide a new way of looking at Indian-white relations and colonial Indian education. -- Provided by publisher.
